

The Presidents Corner

February 5, 2018

Welcome new and veteran members to our club and events. So far this season we have seen growth in our membership, purchase of our own AED, and experience new and exciting trails.

With our membership growing we would like to encourage safety and advice from our senior members to the newest and junior members. Some of that advice is trail etiquette, radio behavior, and the reading of our newest rule changes in the trail book provided to all members. I can name a few instances recently experienced on recent trail rides that do not represent our club in a positive way.

Remember, we share the trails with others and when being overtaken by faster moving traffic, we need to pull over and let them pass as safe as possible. When parking for rest or lunch breaks, always pull to one side or the other to keep the trail open for others. Radio traffic is to be kept to a minimum so the leader and the gunner can communicate. Foul or abusive language on the radio or the trail will not be tolerated. Lastly, the ladies room is on the right! That means that men are not allowed and anyone venturing into the “ladies room” should be immediately corrected to “GET OUT”.

I encourage all of you to READ the book. There is valuable information within the pages of the book that will help you now and in the future. This pertains to ALL members new and seasoned.

Thank you all for your understanding, help, and support throughout the season.

Don Phelps-Club President
