

The Presidents Corner

July 11th, 2019

Hello again from 8,000 feet elevation in the great Colorado Rockies in Buena Vista. Since my last post, we have added a couple new vehicles to our club that I am aware of. E.T. and Chris Miller are re-joining our club with a 2013 JKU Rubicon, which is trail ready with only few modifications to come. Gary and Sharon Younger took delivery of their new 2019 JLU Rubicon, completely modified with a Teraflex 3.5" suspension lift, 37" Toyo's, Rockhard skids and bumpers, and a few other goodies that should prove to be the envy of a lot of us.

Our Treasurer, Sam Ramsey has or had hip replacement surgery and is currently in Surprise in the warmer weather. We wish Sam the best in his recovery efforts with his new hip.

Jim and Sharon Salvevold and Russ and Karen Moes have been touring in Europe, while E.T. and Chris Miller enjoyed an Alaskan Cruise. John and Kathi Shurtz recently attended the Calgary Stampede in Canada as well.

Here in Buena Vista, the temperature continues to climb with 80+ days and 50 degree nights. The snow accumulation has taken its toll on the surrounding mountain passes and trails with avalanches closing a lot of trails with debris. Higher up, (above 13,000 feet) snow and ice still block many trails. The forecast is late July or August before we can enjoy the many trails that surround this area.

Until next month, be safe and enjoy your summer travels.
